

THE Oyez Gateway

The Digital Future Today

Companies House E-Submission Mortgage Charge MR01

For many practices the online submission of MR01 is extremely laden with risk. The Oyez Gateway, our digital submission system automatically manages all of the elements of that risk.

MR01 Registration of Mortgage Charge is currently our main module.

3 transactions: ▶ Registration ▶ Satisfaction ▶ Partial Release

The MR01 is completed by an author in-house (not on-line) and saved as a PDF to Document Management

Accompanying letter and legal instrument in PDF format can be downloaded from document management and attached to the MR01

The author can prepare and print the documents before submission to satisfy in-house processes and protocol. An authoriser then checks a printed (or electronic) copy before approving the submission

Allows up to 2 required attachments including an accompanying letter and legal instrument In PDF format

The submission is checked and your approval returned via the Government Gateway

Certification is provided by Companies House in PDF format and saved to Document Management

The 21 day submission deadline is automatically managed by the system indicating the critical time remaining from the date of creation

We offer Free, No-obligation Gateway System Demonstrations

If you'd like to find out more, please get in touch.

We will be happy to book an online demo at a date & time that's convenient for you
